

■ Total Intelligent Traffic Management Solution

VECON-ITS is a total solution for modern intelligent traffic management in the world. By using pre-defined detect zones in the system without physical loop detectors, VECON-ITS automatically records and computes all the necessary statistics such as traffic volume, speed of vehicles of each lane on the roads for analysis. Relevant information can also be collected and recorded for future reference and use.

 Detect zone

Key Features/Benefits

- Cost-effective solution for modern traffic management
- No use of loop detectors on the roads
- Real-time live road vehicle and traffic data collection
- Multiple lanes concurrent surveillance: up to 4 lanes

Applications

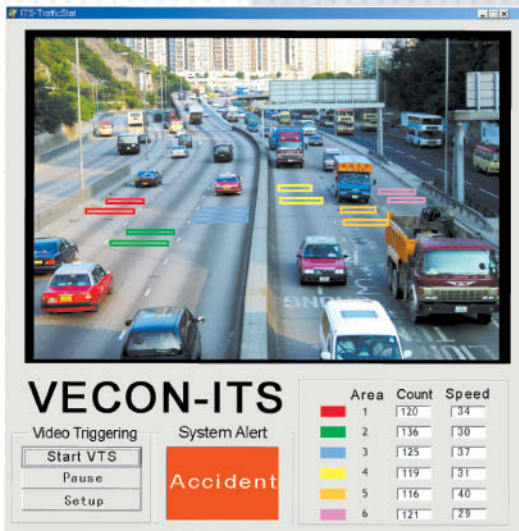

- Road and traffic statistics and analysis
- Road safety management

CCTV camera

Technical Requirements

- Industrial Computer
- Image Capture System

User Interface

Industrial Computer
